INC-0398: Login outage (8 February 2024)

Severity: SEV-1. Incident commander: Priya Raman. Status: closed.

Summary

For 22 minutes no customer could sign in to the dashboard or the mobile app. Payments already in progress were not affected.

Timeline (UTC)

14:03 - The TLS certificate of auth-service expired; logins started failing.
14:11 - On-call engineer paged by the login error-rate alert.
14:25 - A renewed certificate was installed manually. Logins recovered.

Root cause

The certificate for auth-service was renewed by hand every year and the reminder was missed.

Affected services

auth-service only.

Follow-up actions

1. Automate certificate renewal (done in CHG-2266).
